PROFILE

Experienced PHP Developer with 10+ years of building e-commerce platforms (Magento 1/2) and web applications. Specialist in Magento 1 → Magento 2 migrations and module adaptation for newer PHP versions. Creator of a microservices portfolio project (Laravel 12, PHP 8.5, Docker, Kubernetes, RabbitMQ). Regularly using AI tools (Claude, Copilot, Codex) in daily development workflows.

WORK EXPERIENCE

- **Laravel \ WEB Developer** OBECNIE
Personal project

P Blogging Platform – Microservices Architecture
github.com/szymonborowski

Stack: Laravel 12, PHP 8.5, MySQL, Redis, RabbitMQ, Docker, Kubernetes, Traefik

- 6 independent services: Frontend, SSO (OAuth2/Laravel Passport), Admin (FilamentPHP), Users (RBAC), Blog API, Analytics
- Observability stack: Prometheus, Loki, Promtail, Grafana
- Docker images published to GitHub Container Registry (GHCR)
- Kubernetes manifests + ArgoCD; full deployment guide (Minikube)
- **Magento 2 Developer** 03.2022 - 11.2023
Lizard Media - UX & Software House

Magento 2 projects: homla.com.pl, duka.com, sportmix.pl
 - Module installation and customization to client requirements
 - Bug fixing in third-party and internal modules
 - Creating data installers for modules
Project icd.pl:
 - Magento 1 → Magento 2 platform migration
 - Data migrators (PHP CLI scripts + SQL)
 - Module code adaptation to PHP 8.x

■ **Magento 1 Developer**

10.2018 - 02.2022

Deligo.pl

Magento 1 projects: luckygunner.com, targetbarn.com, ptacunits.com, ptac4less.com

- WMS system integrations
- Ongoing system maintenance and module installation
- Automated E2E tests (Selenium, Codeception, Allure)
- Docker development platform extension

- Project kellycodetectors.com:
- MySQL data migration scripts to Magento 1 platform
- Module installation and functionality extension

■ **Customer Support → Junior Developer → Lead QA Engineer → Senior Developer**

03.2010 - 07.2018

Kinguin

Projects & Responsibilities:

E-commerce platforms Magento 1 (1.6-1.9.2, PHP 5.6-7.1):

- kinguin.net, level77.pl, g2play.net

Development & Testing:

- Building custom features and modules
- E2E test automation (Selenium, Codeception, Allure, Galen Framework)
- Writing and managing test scenarios and QA processes
- Extending the Docker development environment for the dev team

Data Engineering:

- Custom MySQL migration scripts for data transfers between platforms

Management & Training:

- Managing a team of manual testers
- Running PHP and Codeception training sessions
- Mentoring juniors and testers

Operations:

- 24/7 technical support
- Bug fixing, translations, store maintenance
- Customer support in English and Polish (initial position)
